Exercise:
It's your turn!

This exercise deals in Active/Passive activity. It's all about understanding the difference between what's visually louder vs quieter and the amount of that difference.

Directions: 1) Using several of the elements shown, create two compositions using exactly the same elements.

Composition 1: Make one element clearly the most active.

Composition 2: Without removing or adding anything, make a different element the most active.

You may change size, position, orientation, color, value, cropping, overlap or transparency. **The goal:** Change what the viewer notices first. Suggested time 45-90 min.
